FENCING AND BARRIERS

Available for hire or sale

KEY INFORMATION

Pedestrian barriers are an essential solution for effective perimeter control and crowd management. Designed for rapid deployment and easy handling, these barriers provide extensive coverage and can be installed quickly to secure areas, create defined walkways, and manage crowd flow.

We currently stock three varieties -

- Standard Galvanised Pedestrian Barrier
- Black Powder-coated Pedestrian Barrier
- Heavy Duty Pedestrian Barrier

INSTALLATION

We can provide full installation and collection for hired pedestrian barriers and can install purchased barriers on request. Deliveries are available via our fleet of small vans, or larger vehicles for higher quantities, with self-offloading options for easy on-site handling.

FENCING AND BARRIERS

Available for hire or sale

FENCING AND BARRIERS

KEY INFORMATION

Temporary Fencing, also known as Heras Fencing, is an essential solution for securing event perimeters, construction sites, and public spaces. These panels can also be covered, providing greater privacy to areas of higher security.

Applications -

- Securing Event Site Perimeters
- Securing Event Control Areas
- Temporary Site Security for the Construction Industry

INSTALLATION

We can provide full installation and collection for hired fencing and can install purchased fencing on request. Deliveries are available via our fleet of small vans, or larger vehicles for higher quantities, with self-offloading options for easy on-site handling.

Available for hire only

KEY INFORMATION

Designed originally for cycle events, these barriers look great when used for a start/finish line. They have been designed with anti-trip in mind, prioritising both athlete and spectator safety. These panels can also hold advertising boards, to display event sponsors.

Key Features -

- Anti-Trip design
- Slots for Advertising Boards
- Rapid deployment

INSTALLATION

We can provide full installation and collection for hired Cycle Barriers. Delivery is available via our fleet of small vans, or larger vehicles for higher quantities, with self-offloading options for easy on-site handling.

FENCING AND BARRIERS

Available for hire or sale

KEY INFORMATION

HD Barriers, or MET Barriers, are often seen in areas with larger crowd flows. They are built to handle the heavy traffic, and are especially effective in areas demanding greater security. They work well for queueing systems, or for separating road users and pedestrians.

Key Features -

- Heavy-Duty construction
- Sturdy design
- Rapid deployment

INSTALLATION

We can provide full installation and collection for hired HD Barriers, and can install purchased barriers on request. Delivery is available via our fleet of small vans, or larger vehicles for higher quantities, with self-offloading options for easy on-site handling.

FENCING AND BARRIERS

Available for hire or sale

KEY INFORMATION

Designed for high-density environments such as concerts and festivals, FOS barriers provide secure crowd separation while ensuring stage security. Featuring an integrated step, they allow security personnel to observe and manage crowds effectively. Constructed from high-strength materials, these barriers are engineered to withstand significant crowd pressure, maintaining stability and safety in even the most demanding event conditions.

INSTALLATION

We can provide full installation and collection for hired FOS Barriers. Delivery is available via our fleet of small vans, or larger vehicles for higher quantities, with self-offloading options for hassle-free and easy on-site handling.

FENCING AND BARRIERS

Available for hire or sale

FENCING AND BARRIERS

KEY INFORMATION

Our hoarding panels provide secure and durable temporary fencing for construction sites, events, and restricted areas. Designed for privacy and safety, they create a solid barrier to protect sites from unauthorized access while also reducing noise and dust.

Key Features:

- Strong and Stable
- Enhanced Security
- Customisable Options

INSTALLATION

We can provide full installation and collection for hired Hoarding Panels. Delivery is available via our fleet of small vans, or larger vehicles for higher quantities, with self-offloading options for hassle-free and easy on-site handling.

POWER AND LIGHTING

Available for hire or sale

KEY INFORMATION

The X-ECO LED is a fuel-efficient, high-performance lighting tower designed for highways, construction sites, trackside projects, and outdoor events. Equipped with energy-saving LED technology, it delivers bright and consistent illumination while minimising fuel consumption. Its compact and durable design makes it easy to transport and set up, offering a practical lighting solution for a wide range of applications.

INSTALLATION

Our Trime Lighting Towers can be delivered and set up by our expert crews to your site. Self-tipping is also available with our Moffett forklifts, allowing for rapid and easy deployment.

POWER AND LIGHTING

Available for hire or sale

KEY INFORMATION

The Trime X-CHAIN is a portable, eco-friendly lighting tower designed for safe and bright illumination in various settings. With zero noise and emissions, it's ideal for events, construction sites, and remote locations where reliable lighting is essential. Its compact and versatile design allows for easy deployment and linking multiple units together for broader coverage.

INSTALLATION

Our Trime Lighting Towers can be delivered and set up by our expert crews to your site. Self-tipping is also available with our Moffett forklifts, allowing for rapid and easy deployment.

POWER AND LIGHTING

Available for hire only

POWER AND LIGHTING

KEY INFORMATION

Our JCB generators provide reliable power for events, construction sites, and remote locations. With sizes up to 40kVA, they are ideal for keeping equipment, lighting, and essential systems running smoothly. Designed for fuel efficiency and low noise, they ensure minimal disruption while delivering consistent performance.

Key Features -

- Fuel-efficient, saving on costs
- Quiet operation
- Durable construction

INSTALLATION

Our generators can be delivered and installed on-site by our experienced crews. We also provide electrical distribution services if required, ensuring everything is set up and ready to go.

GROUND PROTECTION

Available for hire or sale

KEY INFORMATION

Our Euromats provide a reliable ground protection solution for vehicles, pedestrians, and equipment on soft or uneven terrain. Ideal for construction sites, events, and temporary access routes, they help prevent ground damage while keeping sites safe and accessible.

Key Features:

- Strong and Flexible
- Non-Slip Surface
- Lightweight

INSTALLATION

Our MD Trackway can be hired complete with installation by our expert crews. They can also be offered stand-alone for both hire and sales, with or without delivery via our fleet of both small and large vehicles.

GROUND PROTECTION

Available for hire or sale

KEY INFORMATION

Designed to support heavy plant and machinery, our TuffTrak mats provide a stable and secure surface on soft or uneven ground. Their rugged, non-slip design enhances safety, while the durable construction ensures reliable performance in even the toughest conditions.

Key Features:

- Heavy-Duty Strength
- Non-Slip Surface
- Interlocking System

INSTALLATION

Our TuffTrak mats are installed by our expert teams using specialist trackway vehicles and machinery. This ensures a fast, efficient setup, with each mat securely placed to provide a stable surface for heavy plant and machinery.

GROUND PROTECTION

Available for hire or sale

KEY INFORMATION

Our Maxi-Track ground mats offer a smaller, more customisable solution for ground protection. Perfect for pedestrians and light to medium traffic, these mats provide stability on soft or uneven ground while allowing flexibility in layout. Their compact design makes them easy to transport and position, ensuring quick and efficient installation.

INSTALLATION

Maxi-Track ground mats can be installed by our expert teams using the necessary equipment, ensuring a quick and efficient setup.

Alternatively, they are available for stand-alone hire, allowing you to handle the installation yourself if preferred.

GROUND PROTECTION

SITE SUPPORT

Available for hire or sale

KEY INFORMATION

Our drinking water bowsers are available in 1000L and 2000L options, providing a reliable and convenient water supply for events, construction sites, and remote locations. For smaller needs, we also offer bottled water delivery. All our bowsers are designed to meet hygiene standards, ensuring safe, clean drinking water is always accessible on-site.

INSTALLATION

Our bowsers can be delivered to site either full or empty, depending on your needs. They can be delivered or collected directly from our HQ and offloaded with our Moffett forklifts, ensuring safe and efficient placement, even if no forklifts are available on-site.

SITE SUPPORT

Available for hire or sale

KEY INFORMATION

Our picnic benches offer a comfortable and durable seating solution for outdoor events, construction sites, and recreational areas. We stock a range of options, including wheelchair accessible benches, as well as standard 4ft and 6ft models. Made from high-quality materials, our benches are designed to withstand harsh weather and heavy use, ensuring a long-lasting addition to your site.

INSTALLATION

Our benches are offered with delivery, and flexible installation options to suit your needs. We also offer self-offload options, and if required, our team can handle the placement to ensure the benches are securely and appropriately positioned on-site.

SITE SUPPORT

Available for hire only

KEY INFORMATION

We offer John Deere Gators in 2, 3, and 4-seat options, available in both petrol and diesel models. These versatile utility vehicles are perfect for construction sites, outdoor events, and agricultural work. With their rugged design and reliable performance, they can handle a range of tasks, from transporting personnel to carrying equipment across challenging terrain.

INSTALLATION

Our vehicles are delivered directly to your site, ready for use, and can be collected when no longer needed. We offer flexible delivery and collection options to ensure convenience and efficiency, bringing the right vehicle to your site with minimal hassle.
