

Crowd Control Barrier...
GT Barrier...
PED Barrier...
Smartweld ...

Whatever you may call it, we have thousands of barriers ready for your hire and purchase needs.

Key Features:

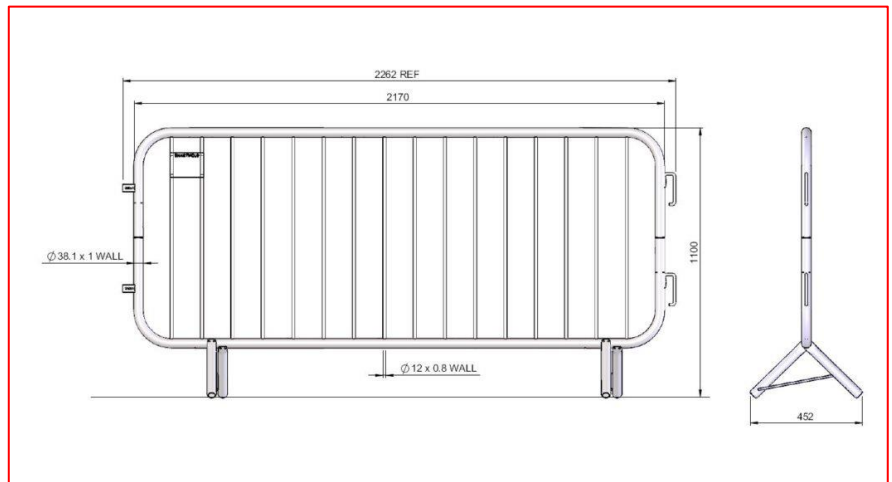

- Lightweight barrier = Easy to handle and manoeuvre
- Pedestrian gates allow access through
- Used extensively at mass participation events to provide effective demarcation

A one piece barrier that simply slots together and therefore makes erection and dismantling quick and easy. The heavy gauge tubular feet are welded to the frame in an offset position which make them perfect for storage.

Available in 2.3 metre lengths with steel tube vertical infill bars, rather than mesh these barriers are suitable for demarcation and ideal for golf courses and fields to control flow of people and filling crowds. The barriers can be configured with pedestrian walk throughs to create a clear path for crowds.

Barrier Covers for the equipment to ensure that events and construction sites are appropriately branded to suit customer requirements.
